COOLING SOLUTIONS FOR MOBILE DELIVERY

TEMPERATURE-CONTROLLED TRANSPORT AND STORAGE

Mobile living made easy.
Taking highly perishable goods safely from one place to another – no problem with mobile refrigeration by Dometic. Our portable coolers have stood and passed the test of practice millions of times. To meet your demanding logistics needs they are fitted with special, high-performance electronics. Whatever it is you are transporting – lab samples, veterinary samples or specimens, temperature-sensitive medicines or perishable food – Dometic products provide one-degree accuracy for your freight!

- All products have been developed in compliance with the strict guidelines of HACCP and GDP.
- All Dometic production plants are certified according to ISO 9001, ISO 14001 as well as the EU Eco-Management and Audit Scheme.
- As an EMAS-certified company, we publish all environmental results as part of the Dometic Environmental Product Declaration.
DOMETIC ON THE WEB

Here’s where you can find the complete Dometic range, with detailed information about all products. Plus, interesting facts about our company and download links for all our catalogues.

Coldmachine Series 90 77 – 79
THE RIGHT TEMPERATURE
KEY TO YOUR SUCCESS

“COOL” IS A VERSATILE WORD …

It can range from –22 °C to +65 °C, depending on the ambient temperature and on whatever is being transported. But for any product, the following applies: The key to success of perfect storage is constant temperature. You know the right temperature for your product. Dometic builds the ideal cooler for you. The temperature is factory-set and maintained at precisely ±2 °C, which can be even more precise, if required. Of course, we can also set two fixed temperatures or just leave it to you to select the temperature. Or install a heater as an additional safety mechanism. Or equip the cooler with a data logger to allow you to demonstrate that the required temperature is maintained during transportation. The possibilities are endless. Get in touch with us.

HACCP – DOMETIC FILLS THE GAPS IN THE COLD CHAIN

HACCP stands for Hazard Analysis Critical Control Points, an internationally binding quality management system for food products. The principle behind it is that all critical points in the delivery chain “from the stable to the table” are closely examined on the spot. For all critical points, limiting values are defined and then continuously checked and documented. Critical risks are always involved when perishable food is exposed to high temperatures, e.g. while shopping or delivering to a customer. Investing in a refrigerated truck is not always financially viable. Why not save money and gain flexibility with mobile refrigeration by Dometic?
FOR A SAFE AND PROFITABLE BUSINESS

Compliance with legal requirements not only means satisfied customers but also more profit. Success comes from within. When introducing an HACCP or GDP management concept, all work processes are put to the test. The decisive factor is the health risk for the consumer, but other deficiencies also come to light in the process. As a result, processes are tightened up, losses are minimised and resources are used more effectively.

HACCP – EVERY DAY WITH DOMETIC

1. Hazard Analysis: Analysing the risks to consumer health
2. Critical Control Points: Tracing critical points in the cold chain
3. Defining the critical limits: What needs to be transported, when and at which temperature?
4. Safety precautions: Integrating coolers in the cold chain
5. Fine adjustment: Which type of refrigeration for which product? Any special designs needed?
6. Documentation: Not compulsory but advisable – and easy with Dometic!

HACCP: A CONTINUOUS COLD CHAIN FOR PERISHABLE FOOD

Safety has priority when transporting temperature-sensitive goods. Responsible logistics providers thus comply with HACCP regulations and equip and certify their vehicles accordingly.

HACCP: Continuous cooling chain for perishable cooked food and produce

GDP: GOOD DISTRIBUTION PRACTICE FOR SENSITIVE MEDICINES

The EU’s Good Distribution Practice (GDP) has made the requirements on transporting medicines more stringent. For especially sensitive products, the guideline requires operators to show that the required temperature is present along the entire length of the cold chain – even given extreme ambient temperatures. Data loggers etc. are used to prove adherence to temperature demands.
CUSTOMIZED COOLING SOLUTIONS
INTRODUCTION

TAILOR-MADE REFRIGERATION SOLUTIONS
FOR MEDICINES, VACCINES, LAB SAMPLES AND MORE

Especially stringent requirements apply for the transportation and storage of blood donations, vaccines, lab samples, living organs and temperature-sensitive drugs. To ensure maximum safety for consumers, the EU’s Good Distribution Practice (GDP) directive requires temperature management accurate to a single degree, as well as continuous documentation of the temperature curve. Dometic’s cooling solutions for mobile delivery catalogue gives you a cross-section of individual logistics solutions which we have developed for our customers over the past decades - from customer-specific portable coolers to high-quality built-in devices for ambulances, labs, doctor’s surgeries and nursing homes. You can also use our cooling units to turn unutilised niches into your own customised cooling solution.

SPECIAL SOLUTIONS FOR MEDICAL TRANSPORTS, HUMAN AND VETERINARY MEDICINE

• Thermoelectric and compressor cooling and heat-retaining boxes with factory pre-set fixed temperature and customer-specific accessories (page 16 – 31)
• Refrigeration and deep-freeze containers as top loaders and front loaders with customer-specific equipment (page 34 – 43)
• Refrigerated medicine cabinets for on-site storage (page 46 – 49)
• Built-in stainless steel cabinets with compressor cooling or heating (page 50 – 51)
• Thermoelectric built-in cooler and warmer boxes for ambulances (page 52)
• Compressor cooler drawer for veterinary vehicles (page 53)
• Cooling units and evaporators for converting unused storage space into customised cooling solutions (page 72 – 79)

SPECIAL SOLUTIONS FOR LABS, RESEARCH FACILITIES, SURGERIES AND NURSING HOMES

• Thermoelectric cooling and heat-retaining boxes with factory preset fixed temperature and customer-specific accessories (page 16 – 21)
• Refrigeration and deep-freeze containers as top loaders and front loaders with customer-specific equipment (page 34 – 43)
• Medicine cabinets with silent absorption cooling (DS series) or powerful compressor technology (HC series) (page 48 – 49)
• Built-in stainless steel cabinets with compressor cooling or heating (page 50 – 51)
• Thermoelectric built-in cooler and warmer boxes for laboratory transports (page 52)
• Cooling units and evaporators for converting unused storage space into customised cooling solutions (page 72 – 79)
CUSTOM-DESIGNED COOLING SOLUTIONS
FOR FOOD PROCESSING, HOTELS AND RESTAURANTS

For transporting fresh produce, deep-freeze goods, warm and cold food, the professional cooling range from Dometic offers numerous tried and tested, reliable solutions which provide you with optimal support for adherence to legally required standards such as HACCP and GDP. Benefit from our decades of experience as market leader for mobile refrigeration and our expertise in customising cool boxes and refrigerators. Get inspired from the multitude of possibilities and talk to us if your requirements go beyond of what we have developed in close collaboration with customers, users, experts and vehicle manufacturers. Or use our ColdMachine range of cooling units and evaporators to create your own, customised refrigeration solution.

HIGH-PRECISION COOLING SOLUTIONS FOR FOOD PROCESSING AND INSPECTION

• Thermoelectric cooling and heat-retaining boxes with factory preset fixed temperature and customer-specific accessories (page 16 – 21)
• Compressor refrigeration and deep-freeze coolers with factory preset fixed temperature and customer-specific accessories (page 22 – 31)
• Refrigeration and deep-freeze containers as top loaders and front loaders with customer-specific equipment (page 34 – 43)
• Cooling units and evaporators for converting unused storage space into customised cooling solutions (page 72 – 79)
• Fully-integrated cooling systems for fresh-goods transport (page 60 – 67)

PROFESSIONAL COOLING SOLUTIONS FOR HOTELS, RESTAURANTS AND CATERING

• Refrigeration and deep-freeze containers as top loaders and front loaders with customer-specific equipment (page 34 – 43)
• Milk and beverage coolers for smaller bars and restaurants (page 56 – 57)
• Passive insulation coolers for food transport (page 12 – 15)
• Cooling units and evaporators for converting unused storage space into customised cooling solutions (page 72 – 79)
• Fully-integrated cooling systems for fresh-goods transport (page 60 – 67)
COOL BOXES

PROFESSIONAL COOLING
PASSIVE COOLERS

DESIGNED FOR THE TOUGHEST CONDITIONS!

Hot outside temperatures, shock and impact during transport, frequent opening and closing, packing and stacking – Dometic Cool-Ice boxes take it all with ease.

- For temperature-sensitive produce
- Highly-effective insulation
- Easy to clean
- Nine sizes – from 13 to 111 litres
COOLING WITHOUT ELECTRICITY

Dometic Cool-Ice passive coolers, as the name suggests, require no energy supply. This makes them ideal for air freight logistics or other applications where mains or battery power are unavailable. Packed with dry ice or freezer packs, they keep temperature-sensitive goods fresh for several hours. Highly-effective insulation combined with a smart labyrinth seal makes it possible. All Cool-Ice boxes are easy to transport, easy to clean and fitted with handy details for convenient handling.

Highly-effective insulation

ROBUST TETHERING POINTS
Integrated in the handle anchors (WCI 33 or higher).

LABYRINTH SEAL
The labyrinth seal prevents any heat from making its way into the interior.

STABLE HANDLES
Making it easy to transport by one or two people. (WCI 33 or higher)

HEAVY DUTY QUALITY
Fit for the rigors of mobile life – can even be used as a seat or to stand on

FULLY INTEGRATED HINGES
With stainless steel rods for more stability and smooth contours

COOL-ICE CI 85W
with wheels and pull-out handle
COLD-HEAT STORAGE FOR HIGHEST DEMANDS

- Extremely low heat absorption
- Highly effective polyurethane foam insulation, combined with an intelligent labyrinth seal
- High-quality, UV-resistant plastic
- Especially sturdy construction thanks to “seamless” production in rotation procedure
- Integrated hinges with stainless steel rods
- Solid ABS locks with stainless steel attachment bolts
- Integrated polyester feet for improved non-slip stability
- Sturdy, ergonomic handles (from WCI 33 and above)
- High-strength anchor points for securing goods (from WCI 33 and above)
- Comfortable shoulder belt (WCI 13/22/33)
- Practical (melt-) water flow (from WCI 33 and above)
- Suitable for food and easy to clean
- Optimised volume/weight ratio
- Available in nine sizes: 13, 22, 33, 43, 56, 71, 86, 87 and 111 litres

MEASUREMENTS DOMETIC COOL-ICE
TROPICOOL THERMOELECTRIC COOLERS

12/24 VOLTS DC OR 230 VOLTS AC AS STANDARD!

Lightweight, low-priced, versatile – these are the hallmarks of thermoelectric refrigeration. The maintenance free cooling technology is great for low-capacity heating or cooling of small to medium-sized spaces. It is based on the thermoelectric principle – which states that heat or cold is generated when the connection between different metals is linked to a direct current power source (Peltier effect). The Dometic TropiCool range (p. 18/19) offers you three different sizes – from the compact 14-litre box to the large 33-litre volume model. All models come with special TC electronics as standard plus a digital display and come pre-wired for 12/24 V DC and 230 V AC.

**ENERGY CLASS A++**

**UP TO 27 °C BELOW AMBIENT TEMPERATURE**

**UP TO +65 °C IN HEATING MODE**

**TEMPERATURE REGULATION DOWN TO THE DEGREE**

For temperature-controlled transports, all the TropiCool boxes can be equipped with highly sophisticated special electronics (see page 20/21) for setting the exact temperature. The soft-touch control panel can be replaced by a digital display.

Aerospace technology for cooling and heating: the thermoelectric Peltier element works accurately, maintenance free and without any refrigerant.
Dometic TropiCool coolers provide cooling up to 27 °C below ambient temperature and heating up to +65 °C. Using the soft-touch operating panel, you can set the desired temperature in seven stages each: from +1 °C to +15 °C in the cooling mode, or from +50 °C to +65 °C in the heating mode. The memory function saves the last set parameters.

**PRODUCT BENEFITS**
- Cooling up to 27 °C below ambient temperature
- Heating up to +65 °C
- 7-stage temperature control in cooling and heating mode
- LED temperature readout
- Memory function saves last setting
- Membrane keypad protects the electronics from dust and moisture
- Active battery protection prevents deep discharge of the vehicle battery
- Reverse polarity protection

**SOPHISTICATED TECHNOLOGY FOR EXCELLENT USER CONVENIENCE**

1. **TC SPECIAL ELECTRONICS**
   With soft-touch control panel and active battery protection

2. **HIGHLY EFFECTIVE INSULATION**
   High level of efficiency

3. **DYNAMIC INTERIOR VENTILATION**
   Significantly improved cooling capacity

4. **MAINTENANCE FREE FAN**
   Long service life

5. **INTELLIGENT ENERGY-SAVING CIRCUIT**
   Electronics switch automatically to power-save mode once the desired interior temperature has been reached.

6. **12/24/230 V CONNECTION AS STANDARD**
   With priority circuit for 230 V

7. **HEAT EXCHANGER AND HIGH-PERFORMANCE PELTIER ELEMENT**
   Cooler output up to 27 °C less than ambient temperature!

8. **MAGNETIC SWITCH**
   Switches the interior fan off automatically when you open the box

9. **UNIVERSAL FIXING KIT AS ACCESSORY**

CUSTOMISING WITH EXTRA MODULES

DATA LOGGER FOR EASY DOCUMENTATION

For the sake of continuous, tamper-proof temperature recording, the DT-07N data logger is firmly integrated in the cooler. The data is imported into the laptop via a data transfer cable with USB – or printed out directly using the clip-on printer. Alternatively, we offer a disposable data logger for documenting the temperature progression (DT-21).

EXTRA MODULES FOR THERMOELECTRIC COOLERS

**DTTC-02**
Setting a fixed temperature in the range from +10 °C to +40 °C (automatic heating or cooling). Max. 27 °C below or 30 °C above ambient temperature. With digital temperature display. Tolerance: ±2 °C. Test report included in the scope of delivery.

Ref. No. 9600024729

---

**DTTC-09**
Two fixed temperatures in a range from +10 °C to +40 °C (automatic heating or cooling). Max. 27 °C below or 40 °C above ambient temperature. With digital temperature display. Easy change from one value to another with rocker switch. Tolerance: ±2 °C. Test report included in the scope of delivery.

Ref. No. 9600024730

---

**DTTC-17**
Alarm will be triggered by a deviation from the target temperature ±4.0 °C lasting more than 5 min. The alarm function is activated 20 min after the cooler starts operating. In combination with DTTC-02 and DTTC-09 only!

Ref. No. 9103540026

---

**DTTC-02**
Setting a fixed temperature in the range from +10 °C to +40 °C (automatic heating or cooling). Max. 27 °C below or 30 °C above ambient temperature. With digital temperature display. Tolerance: ±2 °C. Test report included in the scope of delivery.

Ref. No. 9600024729

---

**DTTC-09**
Two fixed temperatures in a range from +10 °C to +40 °C (automatic heating or cooling). Max. 27 °C below or 40 °C above ambient temperature. With digital temperature display. Easy change from one value to another with rocker switch. Tolerance: ±2 °C. Test report included in the scope of delivery.

Ref. No. 9600024730

---

**DTTC-17**
Alarm will be triggered by a deviation from the target temperature ±4.0 °C lasting more than 5 min. The alarm function is activated 20 min after the cooler starts operating. In combination with DTTC-02 and DTTC-09 only!

Ref. No. 9103540026

---

**DT-21**
Disposable data logger for recording temperature in the cooler. Up to 90 days recording time following activation (USB interface)

Ref. No. 9103540134

---

**DT-07N**
Temperature data logger as a single unit, without software. Software download from www.testo.com

Ref. No. 9103540007

---

**DT-08N**
Thermal printer for displaying the temperature variation graphically (to be used in combination with DTTC-02 and DTTC-09 only!

Ref. No. 9103540008

---

**DT-13**
3-pin plug-in system for built-in power supply. Max. power consumption: 25 A at 12 volts. Flat terminals (4 x 6.3 mm or 1 x 4.8 mm).

Ref. No. 2225400001
COOLFREEZE COMPRESSOR COOLERS

PERFECT FOR DEMANDING LOGISTICAL CHALLENGES

Excellent cooling and freezing performance, low energy consumption – features you can depend on with each compressor appliance from Dometic. The CoolFreeze range offers a matching appliance for every demand – from a compact 10.5-litre box right through to a roomy 85-litre cool box.

All CDF and CFX boxes are pre-wired for 12/24 V DC and 100 – 240 V AC.
For complex logistical applications in laboratory systems, human and veterinary medicine, we fit our tried and trusted compressor coolers with customer-specific extra modules (see page 30/31). One or two factory-preset fixed temperature(s), an additional heater for safe operation at low temperatures, a data logger for easy documentation … there are number of ways of preparing Dometic CoolFreeze compressor coolers for special requirements.

As an additional safety feature the coolers come equipped with a smartphone app, which you can use to access the current temperature in the cooler at any time from your phone. In parallel to this, data is stored on an external server. This can be accessed with a personal PIN for the documentation.

**PICK WHAT YOU NEED – WE DO THE FITTING**

For complex logistical applications in laboratory systems, human and veterinary medicine, we fit our tried and trusted compressor coolers with customer-specific extra modules (see page 30/31). One or two factory-preset fixed temperature(s), an additional heater for safe operation at low temperatures, a data logger for easy documentation … there are number of ways of preparing Dometic CoolFreeze compressor coolers for special requirements.

As an additional safety feature the coolers come equipped with a smartphone app, which you can use to access the current temperature in the cooler at any time from your phone. In parallel to this, data is stored on an external server. This can be accessed with a personal PIN for the documentation.

**1. SOFT-TOUCH OPERATOR PANEL**
Dust and water-proof; digital temperature display

**2. HIGH-QUALITY MATERIALS**
Housing made of injection moulded components

**3. PERFECT PROCESSING**
Optimal function, long life

**4. POWERFUL COMPRESSOR TECHNOLOGY**
Excellent cooler performance even under extreme exterior temperatures; precise temperature control ±1 °C

**5. FLEXIBLE ENERGY SUPPLY**
12/24 V or 12/24 V and 100 – 240 V

**CONFIGURED FOR THE CUSTOMER**
with accessories (p. 30/31)
DOMETIC COOLFREEZE CDF

LIGHTWEIGHT COMPRESSOR TECHNOLOGY

Light, compact compressor coolers – easy to handle and accommodate onboard. Refrigeration and deep-freezing down to –18 °C with minimal power consumption, regardless of the outside temperature.

- 12/24 V DC
- 2 sizes: approx. 10.5 and 18 litres

Please note: Freezing function at ambient temperature max +32 °C. Standard cooling function at ambient temperature max. 43 °C

DOMETIC COOLFREEZE CFX

COMPRESSOR COOLING WITHOUT COMPROMISE

Energy class A++ and deep-freeze temperatures down to –22 °C. Up to 35 % lower energy use thanks to a specially-developed high-performance compressor and extra-strong insulation. Heavy-duty design.

- 12/24 V DC and 100 – 240 V AC
- CFX special electronics with soft-start and turbo cooler function
- 5 versions of approx 32 – 85 litres

Please note: Freezing function at ambient temperature max +32 °C. Standard cooling function at ambient temperature max. 43 °C

COOLFREEZE CFX
COMPRESSOR COOLERS

OUR MOST POWERFUL COMPRESSOR COOLERS EVER!

Energy class A++, freezing down to −22 °C, 35 % lower energy consumption versus comparable models:
With its CFX series compressor coolers, once again Dometic shows how to set benchmarks.
These high-tech devices show their worth in use with compact equipment details:
Corner reinforcements, stainless steel hinges and lid coating withstand the toughest of stresses.

DEEP FREEZING
DOWN TO −22 °C

UP TO 35 % LESS POWER CONSUMPTION!

HEAVY-DUTY VERSION

12/24 V
100 – 240 V
SOLAR OPERATION
**STAY COOL!**

Fitted with heavy-duty details like reinforced corners, stainless-steel hinges and a robust lid lining, the hi-tech coolers in the CFX series can withstand the most demanding of loads. Even so, they are remarkably lightweight and easy to transport.

**POWER**
12/24 volts DC and 100 – 240 volts AC

**DETACHABLE LID**
Heavy-duty version with reinforced corners, robust closing mechanism

**CONNECTIVITY**
USB port for charging small electronic devices

* Operation with 12 or 24 volts only. Operation with 230 volts not possible. Except CFX 100W.

**DT-02**
One fixed temperature (cooling only) with digital temperature display in a range from –18 °C (CDF)/–22 °C (CFX) to +10 °C. Tolerance: ± 2 °C. Test report included in the scope of delivery. If the set temperature is above the expected lowest ambient temperature, the DT 05 heater is required.

Ref. No. 9600024731

**DT-09**
Two fixed temperatures (cooling only) with digital temperature display in a range from –18 °C (CDF)/–22 °C (CFX) to +10 °C. Easy change from one value to another with rocker switch. Tolerance: ± 2 °C. Test report included in the scope of delivery. If the set temperature is above the expected lowest ambient temperature, the DT 05 heater is required.

Ref. No. 9600024732

**DT-04**
High-performance fan for fast cooling or heating and uniform air circulation inside the box (recommended for CFX series). Storage capacity will be reduced by approx. 100 x 100 x 30 mm WxHxD.

Ref. No. 9103540004

**DT-05**
Heater for safer operation at low outside temperatures (if set temperature is above the ambient temperature). Includes DT 04 fan. Operation with 12 or 24 volts only. Operation with 230 volts not possible. Except CFX 100W.

Ref. No. 9103540005
| **DT-07N** | Temperature data logger as a single unit, without software. Software download from www.testo.com  
Ref. No. 9103540007 |
|---|---|
| **DT-08N** | Thermal printer for displaying the temperature variation graphically (to be used in combination with DT-07N).  
Ref. No. 9103540008 |
| **DT-21** | Disposable data logger for recording temperature in the cooler. Up to 90 days recording time following activation (USB interface)  
Ref. No. 9103540134 |
| **DT-29** | Battery pack for the power supply of 24-volt compressor coolers  
Energy = 240 Wh  
Ref. No. 9103540044 |
| **DT-13** | 3-pin plug-in system for built-in power supply.  
Max. power consumption: 25 A at 12 volts. Flat terminals (4 x 6.3 mm or 1 x 4.8 mm).  
Ref. No. 2225400001 |
| **DT-17** | Alarm will be triggered by a deviation from the target temperature ±4.0 °C lasting more than 5 min. The alarm function is activated 20 min after the cooler starts operating. In combination with DT-04 and DT-02 or DT-09 only!  
Ref. No. 9103540015 |
| **DT-15** | Folding trolley with elastic strap and large, easy-running wheels. Only available when purchasing a cooler!  
490 x 1130 x 410 mm (W x H x D)  
Ref. No. 9103540013 |

**PORTABLE LITHIUM BATTERY**

**SUPERIOR PERFORMANCE – RELIABLE POWER SUPPLY**

The Dometic PLB40 Ah Lithium Iron Phosphate battery delivers high levels of mobile power – up to 40 hours of Dometic CFX 40W cooling on a single charge. Designed for powering powered coolers and other 12 V appliances while being off-grid. Thanks to its lightweight and compact design you can enjoy true independence and travel off-grid for longer.

Ref. No. 9600012878

For more information see dometic.com
CUSTOMIZED COOLING SOLUTIONS
COOLING CONTAINERS

COO
CONTA
LING INERS
Ice cream vans, on-line produce delivery, fresh goods from wholesalers – these cooler containers from Dometic offer safe, tailor-made, cooling solutions. Available as a front loader or top loader, each in three sizes (209 / 435 / 590 litres). Easy-to-operate slide doors, pallet feet and transport rollers (accessories) ensure comfortable handling. The optional battery set (page 43) can retain the set temperature for up to 8 hours without an external power supply.

**CUSTOMIZED COOLING SOLUTIONS**

**COOLING CONTAINERS**

**REFRIGERATION AND DEEP-FREEZE CONTAINERS FROM DOMETIC**

**AS TOP LOADER OR FRONT LOADER**

Ice cream vans, on-line produce delivery, fresh goods from wholesalers – these cooler containers from Dometic offer safe, tailor-made, cooling solutions. Available as a front loader or top loader, each in three sizes (209 / 435 / 590 litres). Easy-to-operate slide doors, pallet feet and transport rollers (accessories) ensure comfortable handling. The optional battery set (page 43) can retain the set temperature for up to 8 hours without an external power supply.

**TOP LOADER (+4 °C / –18 °C FIXED TEMPERATURE*)**

- Two factory-set fixed temperatures: +4 °C / –18 °C*
- Toploading, minimum refrigeration losses
- Heavy-duty design – sturdy with long life expectancy
- Pallet feet for secure loading and unloading with fork-lifts
- Attachments to tie the box safely down in the vehicle
- Customer-specific accessories (e.g. battery set, transport rollers, data logger, page 43)

Independent energy supply: The optional battery set ensures a constant cooling temperature for up to 8 hours (at an external temperature of 32 °C), without an external power supply.
PERFECTLY EQUIPPED FOR YOUR LOGISTICS
CONTROL DOWN TO THE EXACT TEMPERATURE – WITH MANY PRACTICAL EXTRAS

PRODUCE DELIVERY SERVICE
More and more customers are having food, vegetables, dairy products and frozen goods delivered directly to their door. With the new refrigeration and deep-freeze boxes from Dometic, transport firms assure the cooling chain remains complete from supermarket or warehouse to the consumer as a legal requirement.

DELIVERY LOGISTICS FOR BARS AND RESTAURANTS
Customized Cooling Solutions chain management in bars and restaurants begins with the purchase of produce at the wholesaler. The required refrigeration temperature must be met at all times. Loading and unloading is much more convenient with Dometic cooling containers.

FRONT LOADER (+4 °C FIXED TEMPERATURE*)
- A factory-set fixed temperature: +4 °C*
- Frontloading, top can be used for storage
- Heavy-duty design – rugged, long-life
- Pallet feet for safe loading and unloading with fork-lifts
- Attachments to tie the box safely down in the vehicle
- Customer-specific accessories (e.g. battery set, transport rollers, data logger, page 43)

HEAVY-DUTY EQUIPMENT:
- with locking and easy-to-operate slider doors

TEMPERATURE SWITCH KEY
- Simple, safe configuration of fixed temperature in toploaders

ATTACHMENT POINTS
- For safe fixing or tying down of the refrigeration containers in the vehicle

FLEXIBLE POWER SUPPLY
- 230 V AC, 12 V DC, in part also with 24 V DC, independent operation possible with battery set

*At an external temperature of +38 °C
** With FO1000, FO650 and FO850

DOMETIC COOLING CONTAINERS
FLEXIBLE SOLUTION FOR LEASING VEHICLES
AND MULTIPURPOSE VEHICLES

With our compressor cooling containers Dometic CoolFreeze FO 600 and FO 800 you can have a flexible solution for leasing vehicles, dual temperature for refrigerated vehicles or multipurpose vehicles. The spacious 600 or 800-litre containers are simply lashed to the cargo floor with straps or hooks. Energy for cooling comes from the 12-volt vehicle battery or a 230-volt mains supply.

For refrigerated transport we recommend the FO 800NC with a factory-preset fixed temperature of +4 °C. The FO 650 comes standard with two preset fixed temperatures. That means you can choose from two settings to suit the application at hand: +4 °C for refrigeration or –18 °C for deep-freezing. Another benefit of this retrofit solution: clean removal is possible anytime.

HEAVY-DUTY EQUIPMENT
Stainless steel hinges and locks

INTEGRATED AIR FLOW PANELS
Ensures a steady temperature distribution from bottom to top

*At an external temperature of 32 °C.

OPTIONAL ACCESSORIES FOR REFRIGERATION AND DEEP-FREEZE CONTAINERS

In developing our refrigeration containers, we have taken into account many practical requirements – e.g. equipment for transporting with forklifts. Alternatively, you can replace the pallet feet with wheels. Or add a digital system to document temperature variations.

Choose what fits your application!

* only available as original equipment
**DT-07N**
Temperature data logger as a single unit, without software. Software download from www.testo.com

Ref. No. 9103540007

---

**DT-08N**
Thermal printer for displaying the temperature variation graphically (to be used in combination with DT-07N).

Ref. No. 9103540008

---

**DT-23**
Configuring a fixed temperature in the range from +4 °C to +25 °C according to customer requirements. Tolerance: ± 2 °C. Automatic heat & cool function. Test report included in the scope of supply.

Ref. No. 9103540428

---

**DT-24**
Battery set including charger. For off-mains operation for up to 8 hours (at an external temperature of +32 °C). Only available as a factory-fitted option.

Ref. No. 9103540411

---

**DT-25**
Wheel set (4x set) for safe and easy transport to the place of installation
Content: 2 fixed wheels, 2 movable wheels with parking brake, height: 127 mm

Ref. No. 9103540412

---

**DT-31**
4-way metal pallet (Euro size) screwed to the container to increase flexibility in use with a forklift truck. Increased overall height: 130 mm. 1200 x 800 x 130 mm (L x W x H) Load capacity 1500 kg
For FO850NC and FO1000NC

Ref. No. 9600024929

---

**DT-32**
24 Volt DC set
Extension of reefer containers to 24 volt application.

Ref. No. 9600024930
DOMETIC DS AND HC SERIES
MEDICINE CABINETS

THE IDEAL SOLUTION FOR STORING VACCINES, INSULIN AND OTHER HEAT-SENSITIVE DRUGS SAFELY AT A TEMPERATURE BETWEEN 2 °C AND 8 °C. THE COMPARTMENTS ENABLE YOU TO KEEP THE MEDICINE ARRANGED AND GROUPED CLEARLY. A DIGITAL THERMOMETER MONITORS THE INTERNAL TEMPERATURE AND STORES THE HIGHEST AND LOWEST TEMPERATURE FOR A DEFINED CONTROL PERIOD.

- CONSTANT TEMPERATURE LEVEL
- +5 °C FIXED POINT TEMPERATURE (±3 °C VARIATION)
- AUTOMATIC DOOR ALARM

HC 302 + HC 502 also available as DIN version

230 V
+2 °C TO +8 °C
**HEALTH-CARE REFRIGERATORS**

### THE APPLIANCES IN COMPARISON

You can choose between different cooling techniques and features:

- **DS series with silent absorption cooling:** for normal ambient temperatures, equipped with an external thermometer and plastic drawers (1/2 extension); replaceable door hinge

- **HC series with powerful, energy-efficient compressor technology:** equipped with integrated temperature display and high-quality, roll-out metal drawers with plastic front and 3/4 extension

### PRODUCT BENEFITS

- Automatic alarm: audible warning if the door is open for more than 20 seconds
- Tall drawer fronts: keep warm air out when the door is opened
- Extra modules DT-02 (one fixed temperature) and DT-05 (extra heater) see page 32

HC-DIN devices have the same equipment as HC devices (see page 49) plus the following additional features:

- Optical and acoustic signal at temperature- over- or undershoot
- Optical and acoustic signal in case of power failure for at least 12 hours thanks to integrated battery
- Potential-free contact (e.g., for remote maintenance)

/ Features

- Silent absorption cooling for normal ambient temperatures
- External thermometer with min/max. memory
- Plastic drawers with 1/2 extension and high, transparent front
- Replaceable door hinge
- Can be built-in (variable hinge not possible)

- Powerful compressor cooling – safety under high ambient temperatures, extremely low energy consumption
- Illuminated thermometer with min/max memory built into door
- High-quality, roll-out metal drawer with 3/4 extension for especially well-arranged storage system
- Can be built-in (variable hinge not possible)
- Available accessories for HC 302 / HC 502: DT-02 (see page 31)
CUSTOMIZED COOLING SOLUTIONS  
MEDICINE AND LABS / REFRIGERATED MEDICINE CABINETS

SILENT ABSORPTION REFRIGERATORS

Medicines, vaccines etc are safely stored in the DS series silent absorption refrigerators. The interior has a constant, even temperature that is monitored by an external thermometer. Practical drawers with high, transparent front provide convenient handling and minimal loss of refrigeration when opening.

When needing to store medicine safely at high ambient temperatures, we recommend a refrigerator with a powerful compressor system. Our HC series devices have an integrated illuminated temperature display. High-quality roll-out metal drawers which can be extended to 3/4 of their depth offer well-organised storage. Quality features: Integrated thermometer with min/max memory, illuminated temperature display, high-quality, roll-out metal drawers with 3/4 extension and plastic front, LED interior lighting, door lock, can be built in (variable hinge not possible). HC 302 / HC 502 optionally available as DIN 58345 compliant model versions (HC 302D / HC 502D). DIN-versions: Optical and acoustic signal in case of power failure for at least 12 hours thanks to integrated battery.

MOBILE, HYGIENIC, WELL-MADE IN EVERY DETAIL

Cooling or heating with ± 1 °C accuracy: Dometic’s innovative generation of refrigerator and warmer cabinets was specifically designed for use in emergency vehicles. The interior temperature is limited at +5 °C or, respectively, +37 °C (±1 °C). This, combined with well thought-out details, qualifies the cabinets for other applications, too.

Compact, low-cost, safe: Our thermoelectric built-in boxes provide reliable cooling or heating for temperature-sensitive medicines and preparations. The interior temperature is limited to a factorypreset value (+5 °C in the cooler box, 39 °C for the warmer box). In ambulances, the small 2.5 litre units fit perfectly into the drawer where they can be permanently wired to prevent theft.

PROFESSIONAL COOLING
MILK AND BEVERAGE COOLERS

MILK-BEVERAGE
AND COOLERS
Cappuccino, café latte, latte macchiato or a simple espresso – the fully-automated coffee machine gives customers what they ask for. Practical equipment for keeping milk fresh is available from cooling specialist Dometic. The Dometic MyFridge products offer space-saving cooling solutions which were especially developed for cafés, restaurants and bistro.

With the compact models MyFridge MF 05M / MF 1M, the milk is filled in dishwasher-safe glasses and then cooled down in the device. In the MyFridge MF 5M mini-fridge, it is drawn directly from the bottle or tetrapack. We recommend the Dometic DW 6 as an elegant bar refrigerator for fizzy water and soft drinks.

INTEGRATED COOLING
The transport of temperature-sensitive freight is a demanding logistic task subject to strict legal regulations. It calls for a vehicle that is equipped to take perishable foodstuffs, medicines or blood donations from one place to another with one-degree accuracy. The modular Dometic Frigo system provides highly reliable cooling solutions for all commonly used refrigerated vehicles. The entire refrigeration system is integrated in the vehicle where it takes up little space – and without the roof-mounted structure you typically have with other manufacturers’ systems.

It takes just a few easy steps to create a customised precision cooling system. You start by specifying the type of vehicle, the size of the load compartment and the required temperature conditions. We then put together the modules to suit your specifications. If required, we add optional features such as a stationary cooling system to be operated from the control panel.
CERTIFIED REFRIGERATION FOR RELIABLE COLD CHAIN MANAGEMENT

Companies transporting foodstuffs or other temperature-sensitive products have to meet strict legal requirements. They are responsible for ensuring that the cold chain is maintained throughout the product’s way to the consumer. No problem – Dometic Frigo cooling systems for refrigerated vehicles are 100% reliable. Our systems are ATP-approved and certified to DIN 8958, a standard regulating the performance and functioning of cooling systems for thermally insulated means of transportation. Customers can be sure they can transport their sensitive freight safely and reliably at all times.

FULLY INTEGRATED COOLING – NO ROOF-MOUNT STRUCTURE

Dometic Frigo refrigeration systems give you the unique benefit of fully integrated installation. The evaporator unit is fitted to the ceiling of the cargo compartment in a space-saving manner. It’s never in the way – neither during loading and unloading, nor during clean-up. Unlike with other manufacturers’ systems, there’s no roof-mounted structure. That means:

• No problems with headroom restrictions, e.g. in underground car parks
• Safer driving even in tricky situations, because the vehicle’s centre of gravity remains unchanged
• No roof cut-out required – the chassis’ stability and anti-corrosion properties are preserved
• No impairment of the vehicle’s appearance and aerodynamics

STAND-BY COOLING OPTION FOR DOMETIC FRIGO

The optional stand-by cooling kit optimises the logistic workflow. The vehicle can be loaded or remain loaded overnight so as to be ready in the morning to get on its way. There is no need to store the goods temporarily in a stationary cooling room. The compressor of the stand-by cooling kit is installed in the driver’s cab underneath the seat; a 230 V external socket for connecting the system is built into the front bumper. As the cooling components of the installation are also supplied with on-board current in stationary mode, we have added a high-quality IU0U charger which ensures the vehicle battery is properly charged.

HOT GAS DEFROSTING AS STANDARD OR OPTIONAL

Problems with long idle times when the evaporator is iced and needs to be thawed? Simply activate the Dometic Frigo hot gas defrosting system to get your vehicle back on the road in no time at all. It heats up the refrigerant between the compressor and evaporator and thaws the evaporator quickly, so it can work with full efficiency again.

Hot gas defrosting is included as standard on Dometic Frigo DC systems, but optional on the Dometic Frigo version.
Today’s compact van models offer little space for retrofitting a transport cooling systems. Quite often, it is impossible to integrate a belt-driving compressor in the engine compartment. The new generation Dometic Frigo DC systems solve this problem in a smart way. The compressor and the condenser are combined in a compact unit which is fitted in the spare wheel compartment. Like with all Dometic Frigo systems, the evaporator is mounted to the ceiling of the cargo hold.

DOMETIC FRIGO DC ADAPTER KITS FOR FAST AND EASY INSTALLATION

Our vehicle-specific Dometic Frigo DC adapter kits allow fast and easy installation of the compressor-condenser unit. Available for the most common vans. Contact your local dealer for more information.

Vehicle requirements: the vehicle must have minimum a 125 A alternator and a 90 A/h battery.
(Data for driving mode, stationary mode varies) *For outside temperature 30 °C and 0 °C inside temperature (according ATP)
DOMETIC FRIGO DC – THE SMARTEST AND EASIEST COOLING SYSTEM

- Combined compressor and condenser unit fitted in the spare wheel compartment giving faster and easier installation
- Variable speed compressor giving constant temperature control, higher performance and lower power consumption
- As no installation is required in the engine compartment it can be fitted to most vehicle
- Easy to service and maintain – less components, beltless compressor
- Integrated hotgas defrost function (serial)

- Intelligent compressor control unit which controls the RPM of the compressor and condenser fan according available energy (battery protection) and cooling performance requirement.
- Patented Power Management
- Approved according to automotive standards
- Easy to upgrade with stand-by cooling (battery charger and cable kit)

For detailed information about the Dometic Frigo modular system, please refer to the Dometic Frigo price and programme overview.

Dometic Frigo refrigeration systems comprise several components, some of which are available as options. The modular concept allows easy customizing for refrigerated and deep-freeze applications. Reliable cooling at constant temperatures can be achieved for load compartment volumes up to 18 m³. Regardless of whether it’s long distance or local distribution, continuous cooling is guaranteed at all times.

You start with selecting the right size of evaporator, then you add the matching condenser and compressor. All in all, it will take only 8 to 12 hours to install the three basic components.

**Our tip for deep-freeze applications**
The Dometic Frigo DC kit includes all special components you need: hot gas defrosting for the evaporator and condensation drain, a low-pressure switch, and an oil separator.

MODULAR SYSTEM FOR EASY CUSTOMIZING

- Internal assembly of the evaporator – no impact on the appearance or the aerodynamic properties of the vehicle
- Nothing on the roof – no risk of damage when driving into underground car parks
- Safer when having to make sudden movements as the vehicle’s centre of gravity is not changed

For detailed information about the Dometic Frigo modular system, please refer to the Dometic Frigo price and programme overview.

## PRODUCT SELECTION

Operation performance according to ATP regulations with 3 door openings per hour at 30 °C outside temperature

### NEW
- **Dometic Frigo DC 2500**
  - Refrigeration R 134a
  - Specifications for R134a: k-value = 0.7 W (m² K) with 3 door openings of 3 minutes each per hour, ambient temperature 30 °C, relative air humidity 60 % (DIN 1815)
  - Capacity cargo room:
    - 0 m³
    - 5 m³
    - 10 m³

- **Dometic Frigo DC 3500**
  - Refrigeration R 134a
  - Specifications for R134a: k-value = 0.7 W (m² K) with 3 door openings of 3 minutes each per hour, ambient temperature 30 °C, relative air humidity 60 % (DIN 1815)
  - Capacity cargo room:
    - 0 m³
    - 5 m³
    - 10 m³

- **Dometic Frigo DC 4500**
  - Refrigeration R 134a
  - Specifications for R134a: k-value = 0.7 W (m² K) with 3 door openings of 3 minutes each per hour, ambient temperature 30 °C, relative air humidity 60 % (DIN 1815)
  - Capacity cargo room:
    - 0 m³
    - 5 m³
    - 10 m³
    - 15 m³
    - 20 m³

### Info
- The Dometic Frigo control unit displays when service is due. The cooling system will keep running, though. The calculation of the operating hours is based on the time the compressor is in operation. Service is due after the first 100 operating hours after the cooling system’s initial start-up, and then every 1,000 operating hours.

---

**Contents, specifications and availability are subject to change in the interests of technical improvement.**
UNIQUE TECHNICAL DETAILS
DOMETIC FRIGO EXCELS WITH QUALITY

Performance, efficiency, durability, ease of installation and ease of maintenance: these are the requirements to be met by the designers of fully integrated cooling systems. Here are just a few technical details where Dometic Frigo systems make a difference.

MULTI-POINT REFRIGERANT INJECTION

Dometic Frigo systems owe their excellent cooling performance to a multi-point injection system and the use of evaporators with optimised capacity. The multi-point injection system ensures that the refrigerant is evenly distributed in the evaporator. This, in turn, results in a homogenous evaporation process and improves the cooling performance.

FILTER DRIER WITH SIGHT GLASS

Another beneficial detail is the filter drier with the integrated sight glass, which makes it easy to monitor the fill level and condition of the refrigerant. A single glance on the sight glass is enough to know when the drier needs to be replaced. Damage to the system or downtimes can be effectively avoided. (Dometic Frigo only)

SPLASH-PROOF COMPONENTS

Quality is also the hallmark of the Stand-by cooling system. Dometic is the only manufacturer to offer a splash-proof 230-volt connection to be fitted on the bumper, a patented solution from DEFA.

Optimised cooling: the multi-point injection system on the evaporator improves the distribution of the refrigerant.

Optimised check-up: the sight glass on the filter drier allows you to monitor the cooling system (Dometic Frigo only)
GUNITS
Refrigerated storage is required in market stalls, food trucks, emergency service vehicles and other special applications. Quite often, however, there’s simply no space to spare for it. The alternative is to use the available storage space. With components from the Dometic ColdMachine series you can convert compartments, drawers and all types of containers into customised refrigeration solutions.

The range includes cooling units in three performance categories – all with power-regulated high-tech compressors and complementary evaporators in various shapes and sizes.
DOMETIC COLDMACHINE SERIES 50
Entry-level units at a great price

- Designed for small refrigerator capacities (up to approx. 130 litres) and for use in normal ambient temperatures
- Equipped with a power-regulated compressor
- Two air-cooled units of different body shapes
- Three evaporator types each designed to precisely match the compressor performance
- Corrosion-resistant stainless steel mounting plate
- Impeccable operation in inclined position

DOMETIC COLDMACHINE SERIES 80
Professional units for individual cooling comfort

- Designed for small and medium refrigerator capacities (up to approx. 250 litres) and for use in normal ambient temperatures
- Equipped with a power-regulated compressor
- Three air-cooled units of different body shapes
- Seven evaporator types and one cold accumulator with automatic programme controller, each designed to precisely match the compressor performance
- Corrosion-resistant stainless steel mounting plate
- Impeccable operation in inclined position

DOMETIC COLDMACHINE SERIES 90
Professional units for highest demands

- Designed for extra-large refrigerator capacities (up to approx. 400 litres), for deep-freeze cooling (up to approx. 200 litres) and for use in hot ambient temperatures
- Equipped with a power-regulated high-performance compressor (25 % more cooling power)
- Three air-cooled units of different body shapes
- Three evaporator types and one cold accumulator with automatic programme controller, each designed to precisely match the compressor performance
- Corrosion-resistant stainless steel mounting plate
- Impeccable operation in inclined positions
- With AEO electronics (Adaptive Energy Optimiser)
